

SCANNER TECHNOLOGIES ANNOUNCES APPEAL HEARING DATE

MINNEAPOLIS--(BUSINESS WIRE)--Scanner Technologies Corporation (OTCBB:SCNI - News) today announced that the United States Court of Appeals for the Federal Circuit has scheduled oral argument on May 9, 2008 for its appeal of a decision by the U.S. District Court for the Southern District of New York.

In July of 2000, Scanner Technologies Corporation instituted an action against ICOS Vision Systems Corporation N.V. in the Southern District of New York for infringement of two U.S. patents 6,064,756 and 6,064,757 owned by Scanner.

In June of 2007, the New York court entered an order that states Scanner's '756 and '757 patents are not infringed by ICOS and its customers, and Scanner is barred from enforcing all of its patents related to inspecting ball grid array devices in three dimensions.

In November of 2007, the New York court issued a supplemental judgment that ordered Scanner to pay ICOS more than \$3.3 million in fees and costs. In January of 2008, the Court of Appeals ordered a stay of that supplemental judgment.

Scanner previously appealed a summary judgment ruling of non-infringement by the New York court in this case. In April of 2004, about three months after it heard oral argument, the Court of Appeals vacated the summary judgment ruling and overturned a claim construction ruling in Scanner's favor.

About Scanner Technologies Corporation:

Scanner is a New Mexico corporation that invents, develops and markets vision inspection products that are used in the semiconductor industry for the inspection of integrated circuits. Scanner's headquarters are located in Minneapolis, Minnesota and has a manufacturing facility in Tempe, Arizona.
